# Solaris

Lighting panels to enhance spaces and the value of objects in shop, stores and exhibitions. The panels can be integrated in our electrified structures or used in stand-alone scenarios.

Solaris luminous display panels enhance the illuminated object by giving it exceptional visibility, thanks to uniformly diffused natural light that is free from reflections, shadows and glare. Each Solaris panel is made to measure and can be customized in size, shape (even round) and light source type; the front panel can be personalized with prints and graphics, making it a valuable visual communication tool for public and commercial spaces. Solaris is the ideal solution also for museums and retail environments, where optimal lighting improves the visitors' experience, enhancing the artwork and objects on display. The full customization makes the product the perfect choice for any installation.

## Tailor made

Solaris panels can be made, depending on the model, with dimensions up to 3000x2000mm and thicknesses between 6 and 22mm. Customizable in shape, whether square or round, the panels are available in different finishes and with different types of LED light sources.

## Remote Control

Personalized lighting effects with MEC Driver, the power supply and control modules system: switching, intensity adjustment and color temperature regulation at your will with L&S Smart control systems (such as radio controls and sensors) or via smartphone or voice control systems.

## Solaris Double Side

24 V

### Versatility of application

Solaris Double Side is a double-sided LED panel: customizable on both sides with prints and graphics, it becomes a precious visual communication tool for public and commercial spaces.

**Thickness**  
20 mm

**L x H mm (max)**  
2000 x 1000 mm  
3000 x 1000 mm only with double output for each side

**Custom shape**  
Upon request

**LED Light source**  
Mono / EDC / Emotion

**LED Watt (max)**  
Max 72W 24 V  
(per cable exit)

**N. Illuminated sides**  
4 + 4

**N. Cable outputs**  
1 lateral for each side  
2 with dimension upper to 2000mm for each side

**Freestanding**  
No

**Printable (on opal)**  
Yes

## Solaris Back

12 V 24 V

### Backlight

Solaris Back is a backlight with infinite customisation possibilities in terms of size, type of light and final application. The front panel can be customised with prints and graphics, making it a valuable visual communication tool for public and commercial spaces: Solaris Back can be integrated into existing structures, such as cabinets and shelves, in domestic and commercial environments.

# Illuminate art

We are constantly investing in research and open innovation processes, creating the harmony of culture and beauty through light.

A clear example of our commitment can be seen in the Sala degli Artefici of the Venice Pavilion at the 17th International Architecture Exhibition "LA BIENNIALE DI VENEZIA 2021", where the new Solaris Glam illuminates eight artworks by young artists winners of the "Artifici del nostro tempo" competition.

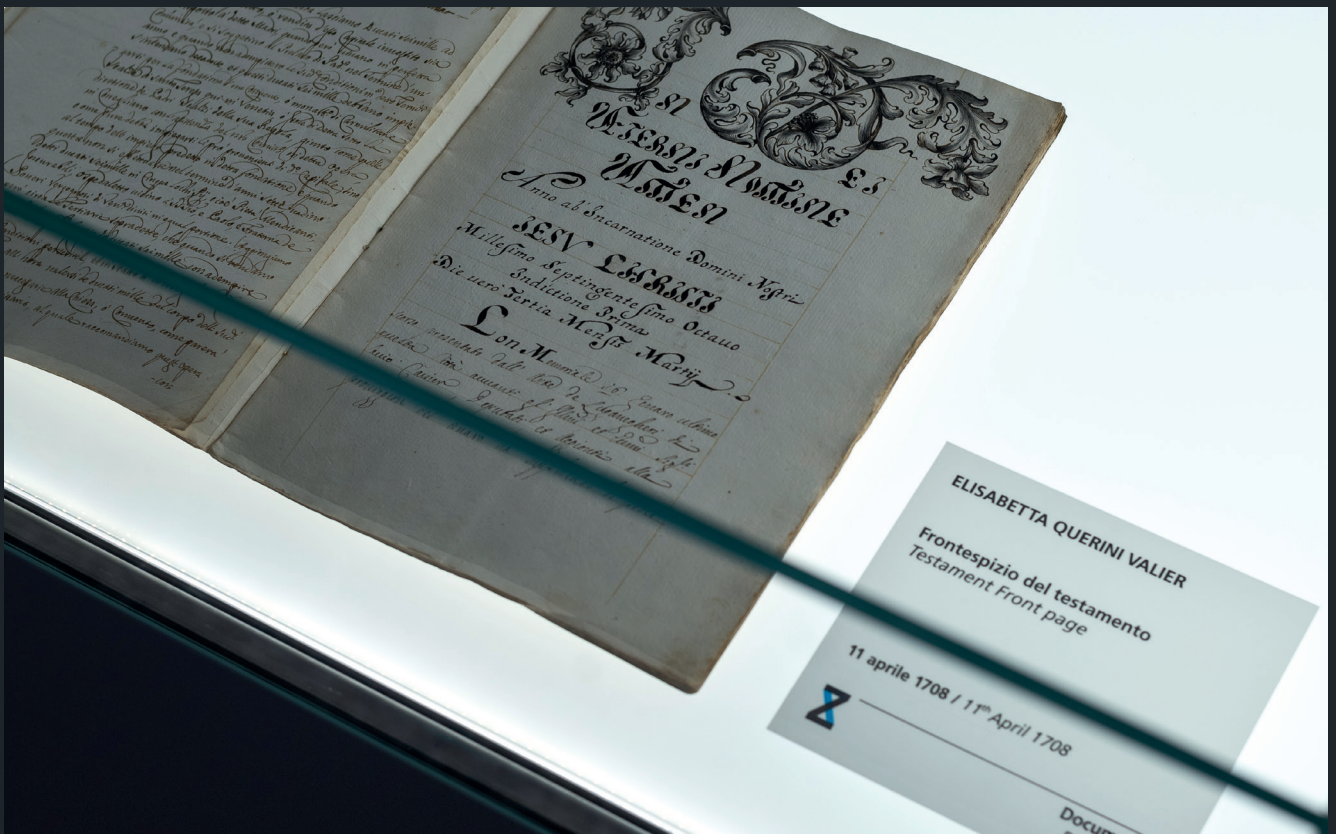

Il Design dei Castiglioni. Ricerca, Sperimentazione, Metodo.  
Galleria Harry Bertoia, Pordenone (2019)

Artefici del nostro tempo.  
Padiglione Venezia - LA BIENNALE 2021, Venezia (2021)

I volti della Pietas Veneziana.  
Palazzo Scala Contarini del Bovo, Venezia (2018)
