THE PERFECT  
SYNTHESIS OF  
LIGHT AND DESIGN

# Sign

Style and flexibility: the perfect synthesis of functional light that furnishes. A practical and consistent solution in all indoor environments

Applied to the wall, Sign traces a horizontal line of light that divides the room, following the architecture of the spaces and creating a continuous decorative light effect. The aluminum structural element, in anodised matte black finish, can be complemented with a range of aluminium accessories or cabinets, thus furnishing each environment. Sign integrates a pair of LED light sources: the upper one acts as wallwasher courtesy light; the lower one is instead a functional lamp, which ensures proper worktop lighting. The IP44 degree of protection allows Sign to be safely installed in damp locations such as bathrooms or kitchens, or any other environment requiring frequent cleaning.

---

**IDEAL FOR**

- any indoor environments
- damp locations (IP44)

**FEATURES**

- versatile and functional
- easy installation
- range of accessories and cabinets
- furnishing light

A new style with refined finishes: modern aesthetics for a more than unique combination of light and furniture

Sign is renewed with **elegant new finishes**, adding Champagne and Anthracite Grey to the standard brushed black. New accessories with **great visual impact** are added to the current range, offering, new aesthetic and functional possibilities in each environment: **new cabinet module with decorative rounded corners** and a new mirror module with curved lines, in which the light harmoniously follow the shapes. Also introducing a **new range of accessories, made in modern shapes with sophisticated materials such as smoked glass and matt black metal wire**, to embellish the horizontal light bar

## Bracket + Cover design, for quick and intuitive fixing

The cover (lamp) profile easily snaps onto a mounting bracket made of extruded aluminium, fixed to the wall by means of screws and dowels (included: the number varies based on the length of the lamp). The concealed internal compartment acts as a cable duct, a clever feature for electrification elements management. The cover profile is complete with plastic end caps.

## Double LED light source with dedicated optics

Sign integrates a double **EDC Dual Color** LED light source: the upper one is a decorative Reel (**120 + 120 LEDs/m**) best used for wall washer effect, whilst the lower one is a more powerful LED Reel (**184 + 184 LEDs/m**) ideal for kitchen worktop functional lighting. On request the 120+120 LEDs/m Reel can be installed both for upper and lower lighting. The use of specially designed optics ensures an evenly distributed light output, with anti-glare effect.

## Control of both LED sources via remote or with integrated IR sensor, available on request

Personalized lighting effects with MEC Driver, the power supply and receiving modules system, which allows individual or simultaneous remote control of both LED light sources. Switching, intensity adjustment and color temperature regulation at your will with L&S Smart control systems (such as wireless sensors and transmitters), via smartphone or voice control systems.

## Easy integration into any environment

Sign is available both in standard or custom measures. On request it can also be provided with 45° angle cuts and special plastic corner joints, thus enabling architectural volumes to be followed, creating a continuous light & decoration effect.
