

Mec Driver

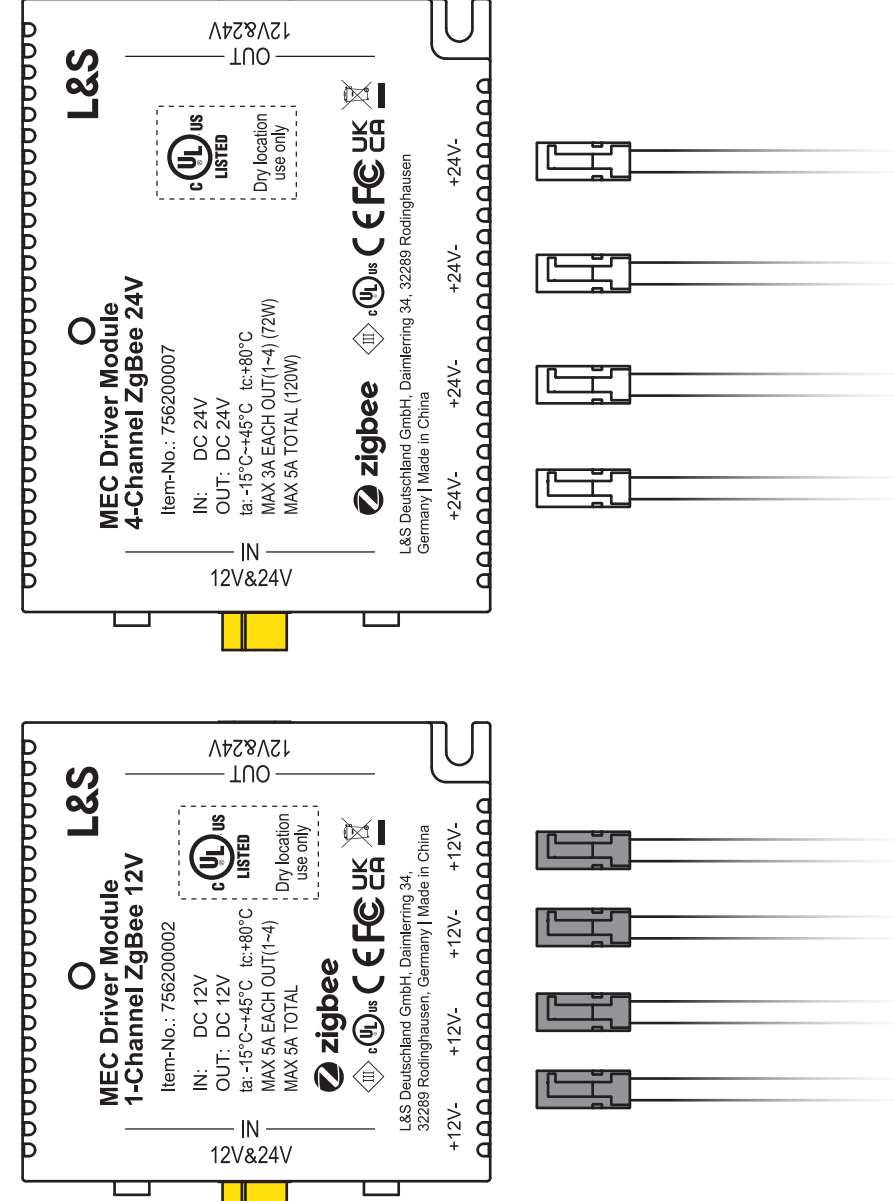

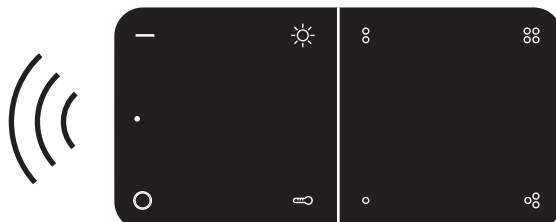

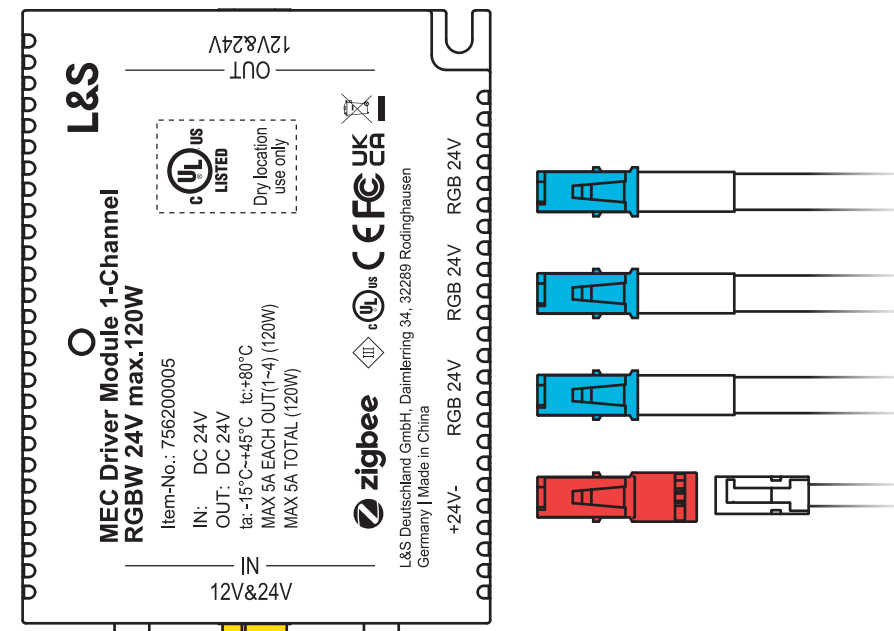

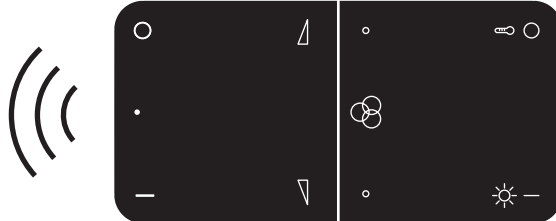

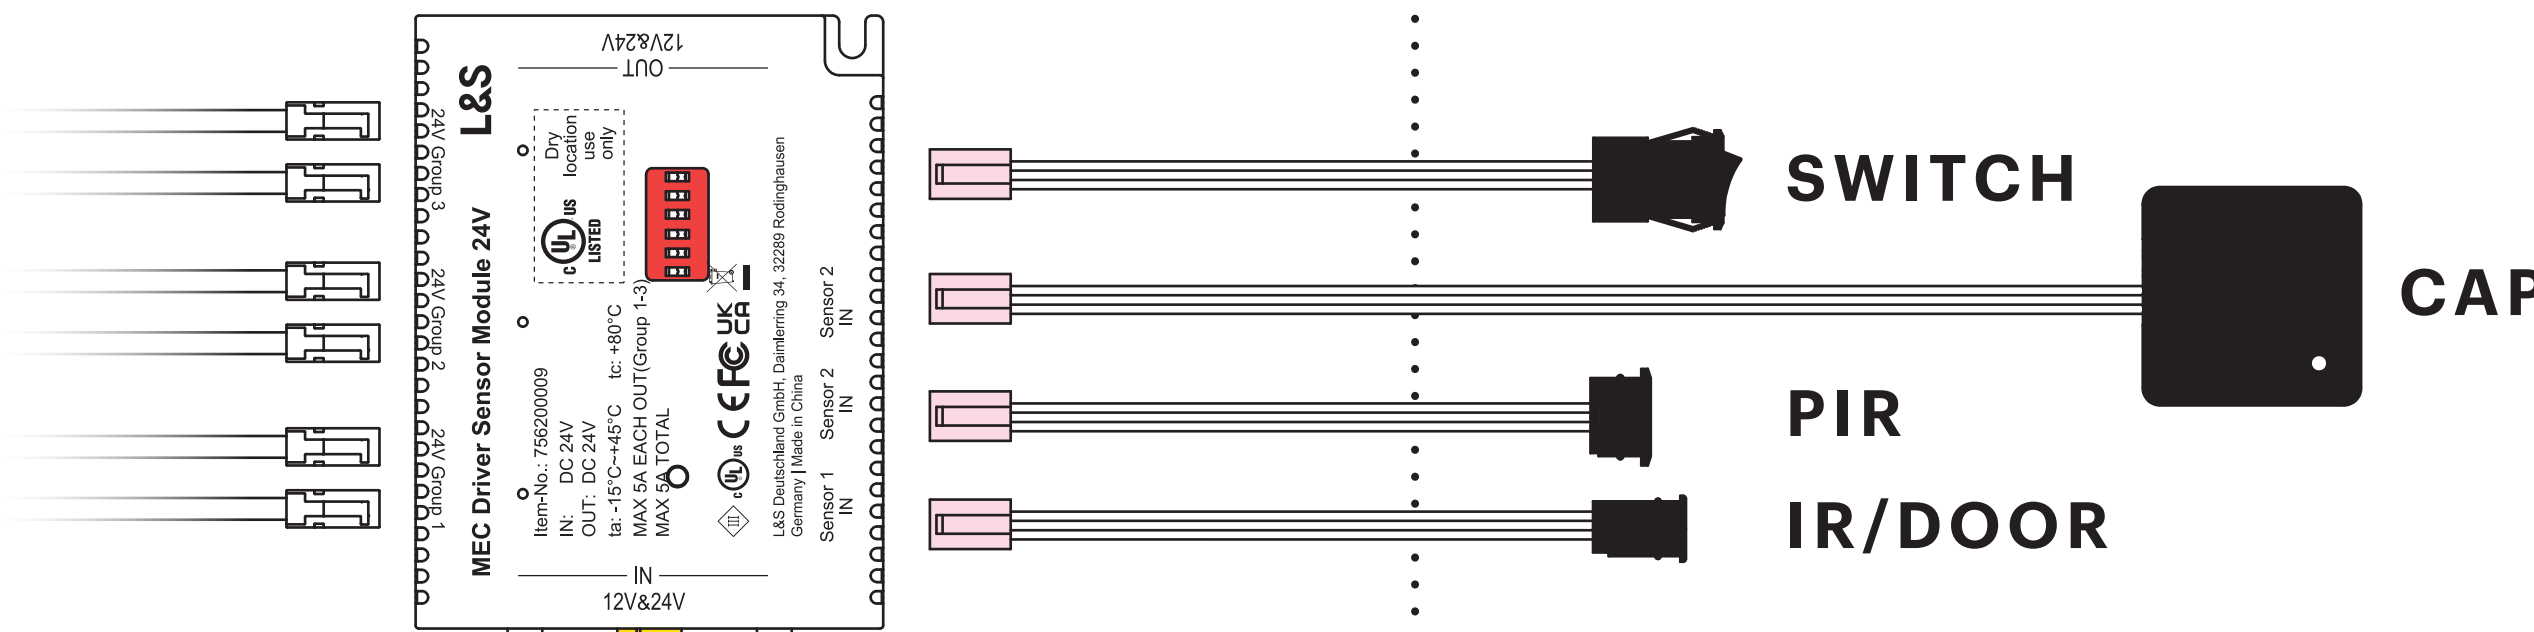

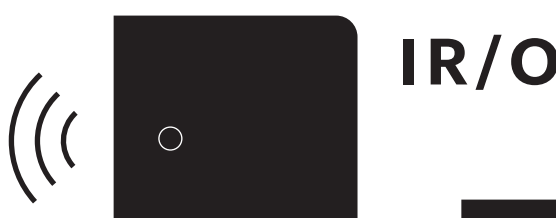

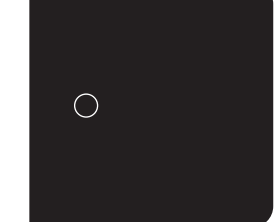

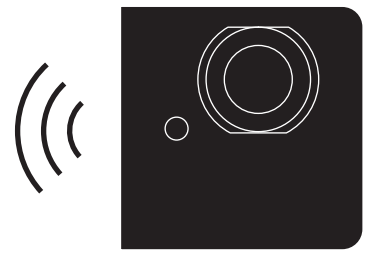

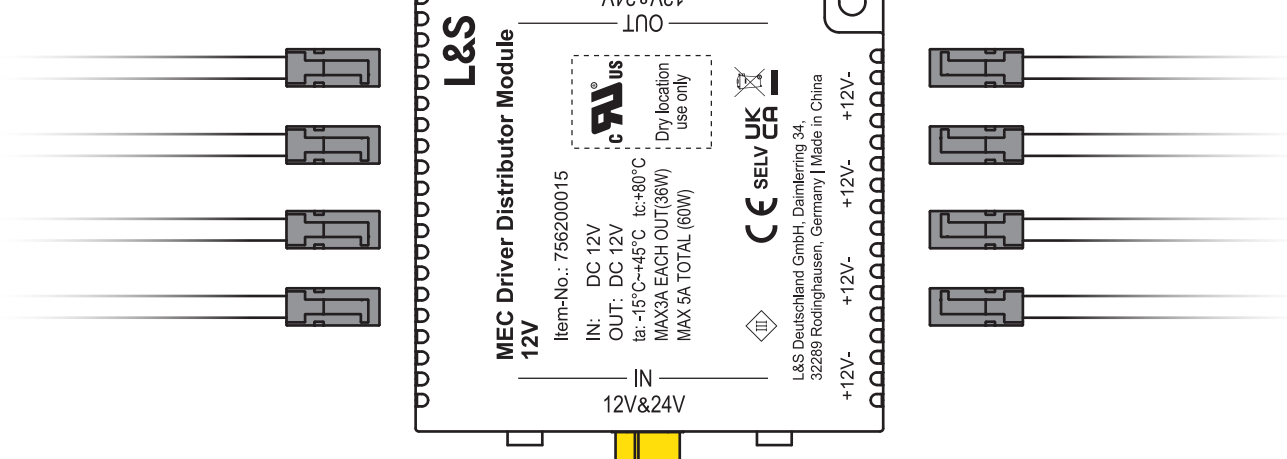

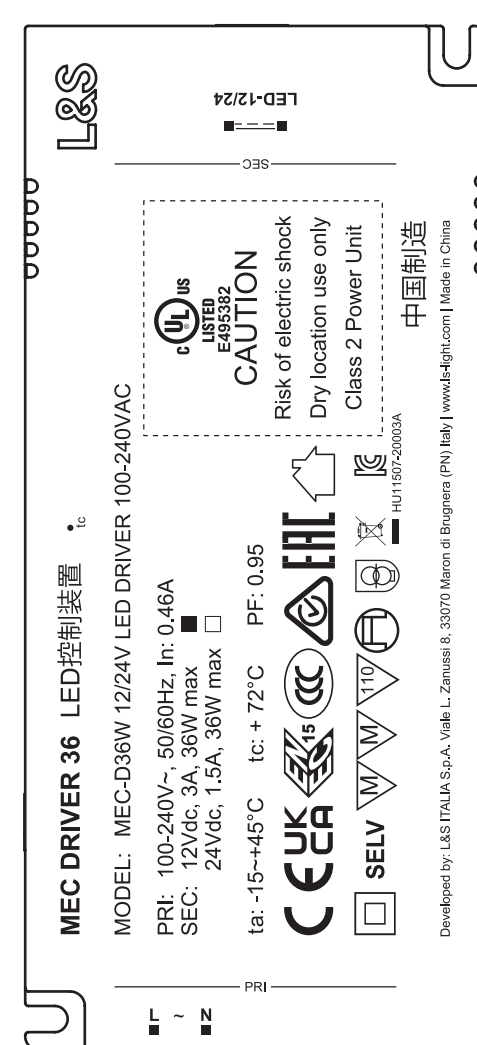

Modular control system. More possibilities

The Mec Driver is available in 6 different wattages (18, 36, 48, 60-72, 90, 120 W) and is compatible with all standard electrical outlets.

- For lighting and home automation
- Suitable for 12V DC and 24V DC
- Light sources (multi-voltage) ready and certified for many markets around the world

Der Mec Driver ist in 6 verschiedenen Wattstärken (18, 36, 48, 60-72, 90, 120 W) erhältlich und mit allen gängigen Steckdosen kompatibel.

- Für Beleuchtung und Hausautomation
- Geeignet für 12V DC und 24V DC
- Lichtquellen (Multispannung) für viele Märkte der Welt bereit und zertifiziert

Bridging connection

Zigbee + Matter module

The easiest module thanks to the integration of Matter and Zigbee control modes in a single device. Choose your mode:

- Matter control mode simplifies the connection between smart devices from different brands via the innovative, fast, and reliable Thread protocol.
- Zigbee control mode enables communication with other smart home devices through a preconfigured Bridge.

Integration von den Matter-und Zigbee-Protokollen in einem einzigen Gerät:

- Matter vereinfacht die Verbindung zwischen Smart-Geräten verschiedener Marken über das innovative, schnelle und zuverlässige Thread-Protokoll.
- Zigbee ermöglicht die Kommunikation mit anderen Smart-Home-Geräten über eine vorkonfigurierte Bridge.
